Preface	iii	Runway and Terrain Slopes Illusion	1-9
Acknowledgements	v	Featureless Terrain Illusion	1-9
Introduction	vii	Water Refraction	1-9
Is an Instrument Rating Necessary?	vii	Haze.....	1-9
Instrument Rating Requirements.....	vii	Fog.....	1-9
Training for the Instrument Rating.....	vii	Ground Lighting Illusions	1-9
Maintaining the Instrument Rating.....	viii	How To Prevent Landing Errors Due To Optical Illusions.....	1-9
Table of Contents	ix	Physiological and Psychological Factors.....	1-11
 		Stress	1-11
Chapter 1		Medical Factors.....	1-12
Human Factors	1-1	Alcohol	1-12
Introduction.....	1-1	Fatigue.....	1-12
Sensory Systems for Orientation	1-2	Acute Fatigue.....	1-12
Eyes	1-2	Chronic Fatigue	1-13
Vision Under Dim and Bright Illumination.....	1-3	IMS SAFE Checklist	1-13
Ears.....	1-4	Hazard Identification.....	1-13
Nerves.....	1-5	Situation 1	1-13
Illusions Leading to Spatial Disorientation.....	1-5	Situation 2	1-13
Vestibular Illusions	1-5	Risk Analysis.....	1-13
The Leans.....	1-5	Crew Resource Management (CRM) and Single-Pilot Resource Management (SRM).....	1-14
Coriolis Illusion	1-6	Situational Awareness.....	1-14
Graveyard Spiral.....	1-6	Flight Deck Resource Management.....	1-14
Somatogravic Illusion.....	1-6	Human Resources.....	1-14
Inversion Illusion	1-6	Equipment	1-14
Elevator Illusion.....	1-6	Information Workload.....	1-14
Visual Illusions.....	1-7	Task Management.....	1-15
False Horizon.....	1-7	Aeronautical Decision-Making (ADM).....	1-15
Autokinesis	1-7	The Decision-Making Process.....	1-16
Postural Considerations	1-7	Defining the Problem	1-16
Demonstration of Spatial Disorientation	1-7	Choosing a Course of Action	1-16
Climbing While Accelerating.....	1-8	Implementing the Decision and Evaluating the Outcome	1-16
Climbing While Turning	1-8	Improper Decision-Making Outcomes	1-16
Diving While Turning	1-8	Models for Practicing ADM	1-17
Tilting to Right or Left.....	1-8	Perceive, Process, Perform.....	1-17
Reversal of Motion.....	1-8	The DECIDE Model.....	1-17
Diving or Rolling Beyond the Vertical Plane	1-8	Hazardous Attitudes and Antidotes	1-18
Coping with Spatial Disorientation.....	1-8		
Optical Illusions	1-9		
Runway Width Illusion	1-9		

Chapter 2

Aerodynamic Factors.....	2-1
Introduction.....	2-1
The Wing.....	2-2
Review of Basic Aerodynamics.....	2-2
The Four Forces.....	2-2
Lift.....	2-2
Weight.....	2-3
Thrust.....	2-3
Drag.....	2-3
Newton's First Law, the Law of Inertia.....	2-4
Newton's Second Law, the Law of Momentum.....	2-4
Newton's Third Law, the Law of Reaction.....	2-4
Atmosphere.....	2-4
Layers of the Atmosphere.....	2-5
International Standard Atmosphere (ISA).....	2-5
Pressure Altitude.....	2-5
Density Altitude.....	2-5
Lift.....	2-6
Pitch/Power Relationship.....	2-6
Drag Curves.....	2-6
Regions of Command.....	2-7
Control Characteristics.....	2-7
Speed Stability.....	2-7
Normal Command.....	2-7
Reversed Command.....	2-8
Trim.....	2-8
Slow-Speed Flight.....	2-8
Small Airplanes.....	2-9
Large Airplanes.....	2-9
Climbs.....	2-10
Acceleration in Cruise Flight.....	2-10
Turns.....	2-10
Rate of Turn.....	2-10
Radius of Turn.....	2-11
Coordination of Rudder and Aileron Controls.....	2-11
Load Factor.....	2-11
Icing.....	2-12
Types of Icing.....	2-13
Structural Icing.....	2-13
Induction Icing.....	2-13
Clear Ice.....	2-13
Rime Ice.....	2-14
Mixed Ice.....	2-14
General Effects of Icing on Airfoils.....	2-14
Piper PA-34-200T (Des Moines, Iowa).....	2-15
Tailplane Stall Symptoms.....	2-16
Propeller Icing.....	2-16
Effects of Icing on Critical Aircraft Systems.....	2-16
Flight Instruments.....	2-16
Stall Warning Systems.....	2-16

Windshields.....	2-16
Antenna Icing.....	2-17
Summary.....	2-17

Chapter 3

Flight Instruments.....	3-1
Introduction.....	3-1
Pitot/Static Systems.....	3-2
Static Pressure.....	3-2
Blockage Considerations.....	3-2
Indications of Pitot Tube Blockage.....	3-3
Indications from Static Port Blockage.....	3-3
Effects of Flight Conditions.....	3-3
Pitot/Static Instruments.....	3-3
Sensitive Altimeter.....	3-3
Principle of Operation.....	3-3
Altimeter Errors.....	3-4
Cold Weather Altimeter Errors.....	3-5
ICAO Cold Temperature Error Table.....	3-5
Nonstandard Pressure on an Altimeter.....	3-6
Altimeter Enhancements (Encoding).....	3-7
Reduced Vertical Separation Minimum (RVSM).....	3-7
Vertical Speed Indicator (VSI).....	3-8
Dynamic Pressure Type Instruments.....	3-8
Airspeed Indicator (ASI).....	3-8
Types of Airspeed.....	3-9
Airspeed Color Codes.....	3-10
Magnetism.....	3-10
The Basic Aviation Magnetic Compass.....	3-11
Magnetic Compass Overview.....	3-11
Magnetic Compass Induced Errors.....	3-12
The Vertical Card Magnetic Compass.....	3-14
The Flux Gate Compass System.....	3-14
Remote Indicating Compass.....	3-15
Gyroscopic Systems.....	3-16
Power Sources.....	3-16
Pneumatic Systems.....	3-16
Vacuum Pump Systems.....	3-17
Electrical Systems.....	3-18
Gyroscopic Instruments.....	3-18
Attitude Indicators.....	3-18
Heading Indicators.....	3-19
Turn Indicators.....	3-20
Turn-and-Slip Indicator.....	3-20
Turn Coordinator.....	3-21
Flight Support Systems.....	3-22
Attitude and Heading Reference System (AHRS).....	3-22
Air Data Computer (ADC).....	3-22
Analog Pictorial Displays.....	3-22
Horizontal Situation Indicator (HSI).....	3-22

Attitude Direction Indicator (ADI)	3-23
Flight Director System (FDS)	3-23
Integrated Flight Control System	3-24
Autopilot Systems.....	3-24
Flight Management Systems (FMS).....	3-25
Electronic Flight Instrument Systems	3-27
Primary Flight Display (PFD).....	3-27
Synthetic Vision	3-27
Multi-Function Display (MFD).....	3-28
Advanced Technology Systems.....	3-28
Automatic Dependent Surveillance—	
Broadcast (ADS-B)	3-28
Safety Systems	3-30
Radio Altimeters.....	3-30
Traffic Advisory Systems	3-31
Traffic Information System	3-31
Traffic Alert Systems	3-31
Traffic Avoidance Systems.....	3-31
Terrain Alerting Systems	3-34
Required Navigation Instrument System Inspection ...	3-34
Systems Preflight Procedures	3-34
Before Engine Start	3-36
After Engine Start.....	3-37
Taxiing and Takeoff.....	3-37
Engine Shut Down	3-37

Chapter 4, Section I

Airplane Attitude Instrument Flying

Using Analog Instrumentation	4-1
Introduction.....	4-1
Learning Methods	4-2
Attitude Instrument Flying Using the Control and	
Performance Method	4-2
Control Instruments	4-2
Performance Instruments	4-2
Navigation Instruments	4-2
Procedural Steps in Using Control and	
Performance.....	4-2
Aircraft Control During Instrument Flight	4-3
Attitude Instrument Flying Using the Primary and	
Supporting Method.....	4-4
Pitch Control.....	4-4
Bank Control.....	4-7
Power Control.....	4-8
Trim Control	4-8
Airplane Trim	4-8
Helicopter Trim	4-10
Example of Primary and Support Instruments	4-10
Fundamental Skills.....	4-10
Instrument Cross-Check.....	4-10

Common Cross-Check Errors.....	4-11
Instrument Interpretation.....	4-13

Chapter 4, Section II

Airplane Attitude Instrument Flying

Using an Electronic Flight Display

4-15	
Introduction.....	4-15
Learning Methods	4-16
Control and Performance Method	4-18
Control Instruments	4-18
Performance Instruments	4-19
Navigation Instruments.....	4-19
The Four-Step Process Used to Change Attitude.....	4-20
Establish.....	4-20
Trim	4-20
Cross-Check.....	4-20
Adjust.....	4-20
Applying the Four-Step Process.....	4-20
Pitch Control.....	4-20
Bank Control.....	4-20
Power Control.....	4-21
Attitude Instrument Flying—Primary and	
Supporting Method.....	4-21
Pitch Control.....	4-21
Straight-and-Level Flight.....	4-22
Primary Pitch	4-22
Primary Bank.....	4-23
Primary Yaw	4-23
Primary Power	4-23
Fundamental Skills of Attitude Instrument Flying	4-23
Instrument Cross-Check.....	4-24
Scanning Techniques	4-24
Selected Radial Cross-Check	4-24
Starting the Scan.....	4-24
Trend Indicators.....	4-26
Common Errors.....	4-28
Fixation.....	4-28
Omission.....	4-28
Emphasis	4-28

Chapter 5, Section I

Airplane Basic Flight Maneuvers

Using Analog Instrumentation

5-1	
Introduction.....	5-1
Straight-and-Level Flight.....	5-2
Pitch Control	5-2
Attitude Indicator.....	5-2
Altimeter	5-3
Vertical Speed Indicator (VSI).....	5-4

Airspeed Indicator (ASI)	5-6
Bank Control	5-6
Attitude Indicator	5-6
Heading Indicator	5-7
Turn Coordinator	5-7
Turn-and-Slip Indicator (Needle and Ball).....	5-8
Power Control	5-8
Power Settings	5-9
Airspeed Changes in Straight-and-Level Flight ...	5-11
Trim Technique	5-12
Common Errors in Straight-and-Level Flight	5-12
Pitch	5-12
Heading	5-13
Power	5-13
Trim	5-13
Straight Climbs and Descents	5-14
Climbs	5-14
Entry	5-14
Leveling Off.....	5-16
Descents.....	5-16
Entry	5-17
Leveling Off.....	5-17
Common Errors in Straight Climbs and Descents....	5-17
Turns	5-19
Standard Rate Turns	5-19
Turns to Predetermined Headings	5-20
Timed Turns	5-21
Compass Turns	5-21
Steep Turns.....	5-22
Climbing and Descending Turns.....	5-24
Change of Airspeed During Turns	5-24
Common Errors in Turns.....	5-25
Pitch	5-25
Bank	5-25
Power	5-26
Trim	5-26
Errors During Compass Turns	5-26
Approach to Stall	5-26
Unusual Attitudes and Recoveries	5-26
Recognizing Unusual Attitudes.....	5-27
Recovery from Unusual Attitudes	5-27
Nose-High Attitudes.....	5-27
Nose-Low Attitudes	5-28
Common Errors in Unusual Attitudes	5-28
Instrument Takeoff.....	5-29
Common Errors in Instrument Takeoffs	5-29
Basic Instrument Flight Patterns	5-30
Race-track Pattern.....	5-30
Procedure Turn	5-30
Standard 45° Procedure Turn	5-30

80/260 Procedure Turn.....	5-31
Teardrop Patterns	5-31
Circling Approach Patterns	5-32
Pattern I.....	5-32
Pattern II	5-32

Chapter 5, Section II

Airplane Basic Flight Maneuvers

Using an Electronic Flight Display5-33

Introduction.....	5-33
Straight-and-Level Flight.....	5-34
Pitch Control	5-34
Attitude Indicator.....	5-34
Altimeter	5-36
Partial Panel Flight	5-36
VSI Tape.....	5-36
Airspeed Indicator (ASI)	5-37
Bank Control	5-37
Attitude Indicator.....	5-37
Horizontal Situation Indicator (HSI)	5-38
Heading Indicator	5-38
Turn Rate Indicator.....	5-38
Slip/Skid Indicator	5-39
Power Control	5-39
Power Settings	5-39
Airspeed Changes in Straight-and-Level Flight ...	5-40
Trim Technique	5-43
Common Errors in Straight-and-Level Flight	5-43
Pitch	5-43
Heading	5-44
Power	5-45
Trim	5-45
Straight Climbs and Descents	5-46
Entry	5-46
Constant Airspeed Climb From Cruise	
Airspeed	5-46
Constant Airspeed Climb from Established	
Airspeed.....	5-47
Constant Rate Climbs	5-47
Leveling Off.....	5-48
Descents.....	5-49
Entry	5-49
Leveling Off.....	5-50
Common Errors in Straight Climbs and Descents....	5-50
Turns	5-51
Standard Rate Turns	5-51
Establishing A Standard Rate Turn	5-51
Common Errors	5-51
Turns to Predetermined Headings	5-52

Timed Turns	5-53	Emergencies.....	6-16
Compass Turns	5-53	Autorotations.....	6-17
Steep Turns.....	5-53	Common Errors During Autorotations	6-17
Unusual Attitude Recovery Protection	5-55	Servo Failure	6-17
Common Errors Leading to Unusual Attitudes	5-58	Instrument Takeoff.....	6-17
Instrument Takeoff.....	5-60	Common Errors During Instrument Takeoffs	6-18
Common Errors in Instrument Takeoffs	5-61	Changing Technology.....	6-18
Basic Instrument Flight Patterns.....	5-61		
Chapter 6		Chapter 7	
Helicopter Attitude Instrument Flying	6-1	Navigation Systems	7-1
Introduction.....	6-1	Introduction.....	7-1
Flight Instruments	6-2	Basic Radio Principles	7-2
Instrument Flight.....	6-2	How Radio Waves Propagate.....	7-2
Instrument Cross-Check.....	6-2	Ground Wave.....	7-2
Instrument Interpretation.....	6-3	Sky Wave.....	7-2
Aircraft Control.....	6-3	Space Wave	7-2
Straight-and-Level Flight.....	6-3	Disturbances to Radio Wave Reception.....	7-3
Pitch Control	6-3	Traditional Navigation Systems.....	7-3
Attitude Indicator.....	6-3	Nondirectional Radio Beacon (NDB)	7-3
Altimeter	6-4	NDB Components.....	7-3
Vertical Speed Indicator (VSI).....	6-5	ADF Components	7-3
Airspeed Indicator	6-5	Function of ADF.....	7-4
Bank Control	6-5	Operational Errors of ADF	7-8
Attitude Indicator.....	6-5	Very High Frequency Omnidirectional	
Heading Indicator	6-6	Range (VOR).....	7-8
Turn Indicator	6-7	VOR Components.....	7-10
Common Errors During Straight-and-Level Flight....	6-7	Function of VOR	7-12
Power Control During Straight-and-Level Flight	6-7	VOR Operational Errors	7-14
Common Errors During Airspeed Changes.....	6-10	VOR Accuracy.....	7-16
Straight Climbs (Constant Airspeed and		VOR Receiver Accuracy Check	7-16
Constant Rate).....	6-10	VOR Test Facility (VOT).....	7-16
Entry	6-10	Certified Checkpoints	7-16
Level Off	6-12	Distance Measuring Equipment (DME).....	7-16
Straight Descents (Constant Airspeed and		DME Components	7-17
Constant Rate).....	6-12	Function of DME.....	7-17
Entry	6-12	DME Arc	7-17
Level Off	6-13	Intercepting Lead Radials	7-19
Common Errors During Straight Climbs and		DME Errors	7-19
Descents.....	6-13	Area Navigation (RNAV)	7-19
Turns	6-13	VOR/DME RNAV.....	7-23
Turn to a Predetermined Heading	6-13	VOR/DME RNAV Components	7-23
Timed Turns	6-13	Function of VOR/DME RNAV	7-23
Change of Airspeed in Turns.....	6-14	VOR/DME RNAV Errors.....	7-24
Compass Turns	6-15	Long Range Navigation (LORAN)	7-24
30° Bank Turn.....	6-15	LORAN Components	7-25
Climbing and Descending Turns.....	6-15	Function of LORAN	7-26
Common Errors During Turns	6-15	LORAN Errors.....	7-26
Unusual Attitudes.....	6-16	Advanced Technologies.....	7-26
Common Errors During Unusual Attitude		Global Navigation Satellite System (GNSS).....	7-26
Recoveries	6-16		

Global Positioning System (GPS)	7-27	Functions of Radar Navigation.....	7-49
GPS Components.....	7-27	Airport Surface Detection Equipment	7-50
Function of GPS	7-28	Radar Limitations	7-50
GPS Substitution.....	7-28		
GPS Substitution for ADF or DME	7-29	Chapter 8	
To Determine Aircraft Position Over a DME		The National Airspace System	8-1
Fix:.....	7-29	Introduction.....	8-1
To Fly a DME Arc:.....	7-29	Airspace Classification.....	8-2
To Navigate TO or FROM an NDB/Compass		Special Use Airspace.....	8-2
Locator:.....	7-29	Federal Airways	8-4
To Determine Aircraft Position Over an NDB/		Other Routing.....	8-5
Compass Locator:	7-29	IFR En Route Charts.....	8-6
To Determine Aircraft Position Over a Fix Made		Airport Information.....	8-6
up of an NDB/Compass Locator Bearing		Charted IFR Altitudes	8-6
Crossing a VOR/LOC Course:	7-30	Navigation Features.....	8-7
To Hold Over an NDB/Compass Locator:	7-30	Types of NAVAIDs.....	8-7
IFR Flight Using GPS.....	7-30	Identifying Intersections	8-7
GPS Instrument Approaches.....	7-31	Other Route Information.....	8-10
Departures and Instrument Departure		Weather Information and Communication	
Procedures (DPs)	7-33	Features.....	8-10
GPS Errors	7-33	New Technologies	8-10
System Status.....	7-33	Terminal Procedures Publications	8-12
GPS Familiarization.....	7-34	Departure Procedures (DPs).....	8-12
Differential Global Positioning Systems (DGPS)....	7-34	Standard Terminal Arrival Routes (STARs).....	8-12
Wide Area Augmentation System (WAAS)	7-34	Instrument Approach Procedure (IAP) Charts	8-12
General Requirements	7-34	Margin Identification.....	8-12
Instrument Approach Capabilities	7-36	The Pilot Briefing	8-16
Local Area Augmentation System (LAAS)	7-36	The Plan View	8-16
Inertial Navigation System (INS).....	7-36	Terminal Arrival Area (TAA).....	8-18
INS Components.....	7-37	Course Reversal Elements in Plan View and	
INS Errors.....	7-37	Profile View.....	8-20
Instrument Approach Systems	7-37	Procedure Turns.....	8-20
Instrument Landing Systems (ILS)	7-37	Holding in Lieu of Procedure Turn	8-20
ILS Components	7-39	Teardrop Procedure	8-21
Approach Lighting Systems (ALS).....	7-40	The Profile View.....	8-21
ILS Airborne Components.....	7-42	Landing Minimums.....	8-23
ILS Function.....	7-42	Airport Sketch /Airport Diagram	8-27
ILS Errors.....	7-44	Inoperative Components.....	8-27
Marker Beacons	7-44	RNAV Instrument Approach Charts.....	8-32
Operational Errors	7-45		
Simplified Directional Facility (SDF)	7-45	Chapter 9	
Localizer Type Directional Aid (LDA).....	7-45	The Air Traffic Control System.....	9-1
Microwave Landing System (MLS).....	7-45	Introduction.....	9-1
Approach Azimuth Guidance	7-45	Communication Equipment	9-2
Required Navigation Performance.....	7-46	Navigation/Communication (NAV/COM)	
Flight Management Systems (FMS)	7-48	Equipment	9-2
Function of FMS	7-48	Radar and Transponders.....	9-3
Head-Up Display (HUD)	7-49	Mode C (Altitude Reporting).....	9-3
Radar Navigation (Ground Based).....	7-49	Communication Procedures	9-4
		Communication Facilities	9-4

Automated Flight Service Stations (AFSS)	9-4	DME Holding	10-12
ATC Towers	9-5	Approaches	10-12
Terminal Radar Approach Control (TRACON).....	9-6	Compliance With Published Standard Instrument	
Tower En Route Control (TEC)	9-7	Approach Procedures	10-12
Air Route Traffic Control Center (ARTCC)	9-7	Instrument Approaches to Civil Airports	10-13
Center Approach/Departure Control	9-7	Approach to Airport Without an Operating	
ATC Inflight Weather Avoidance Assistance.....	9-11	Control Tower.....	10-14
ATC Radar Weather Displays.....	9-11	Approach to Airport With an Operating	
Weather Avoidance Assistance	9-11	Tower, With No Approach Control	10-14
Approach Control Facility	9-12	Approach to an Airport With an Operating	
Approach Control Advances.....	9-12	Tower, With an Approach Control	10-14
Precision Runway Monitor (PRM)	9-12	Radar Approaches	10-17
Precision Runway Monitor (PRM) Radar	9-12	Radar Monitoring of Instrument Approaches	10-18
PRM Benefits.....	9-13	Timed Approaches From a Holding Fix.....	10-18
Control Sequence	9-13	Approaches to Parallel Runways.....	10-20
Letters of Agreement (LOA).....	9-14	Side-Step Maneuver	10-20
Chapter 10		Circling Approaches.....	10-20
IFR Flight.....	10-1	IAP Minimums	10-21
Introduction.....	10-1	Missed Approaches	10-21
Sources of Flight Planning Information.....	10-2	Landing.....	10-22
Aeronautical Information Manual (AIM).....	10-2	Instrument Weather Flying	10-22
Airport/Facility Directory (A/FD).....	10-2	Flying Experience.....	10-22
Notices to Airmen Publication (NTAP)	10-2	Recency of Experience	10-22
POH/AFM	10-2	Airborne Equipment and Ground Facilities.....	10-22
IFR Flight Plan.....	10-2	Weather Conditions.....	10-22
Filing in Flight.....	10-2	Turbulence	10-23
Cancelling IFR Flight Plans	10-3	Structural Icing	10-24
Clearances.....	10-3	Fog	10-24
Examples	10-3	Volcanic Ash	10-24
Clearance Separations	10-4	Thunderstorms	10-25
Departure Procedures (DPs)	10-5	Wind Shear	10-25
Obstacle Departure Procedures (ODP).....	10-5	VFR-On-Top	10-26
Standard Instrument Departures	10-5	VFR Over-The-Top.....	10-27
Radar Controlled Departures.....	10-5	Conducting an IFR Flight	10-27
Departures From Airports Without an		Preflight	10-27
Operating Control Tower	10-7	Departure	10-31
En Route Procedures.....	10-7	En Route.....	10-32
ATC Reports	10-7	Arrival	10-33
Position Reports	10-7	Chapter 11	
Additional Reports	10-7	Emergency Operations	11-1
Planning the Descent and Approach	10-8	Introduction.....	11-1
Standard Terminal Arrival Routes (STARs).....	10-9	Unforecast Adverse Weather	11-2
Substitutes for Inoperative or Unusable		Inadvertent Thunderstorm Encounter.....	11-2
Components.....	10-9	Inadvertent Icing Encounter	11-2
Holding Procedures.....	10-9	Precipitation Static	11-3
Standard Holding Pattern (No Wind).....	10-9	Aircraft System Malfunctions.....	11-3
Standard Holding Pattern (With Wind).....	10-9	Electronic Flight Display Malfunction.....	11-4
Holding Instructions.....	10-9	Alternator/Generator Failure	11-4
Standard Entry Procedures	10-11	Techniques for Electrical Usage.....	11-5
Time Factors.....	10-12		

Master Battery Switch	11-5
Operating on the Main Battery	11-5
Loss of Alternator/Generator for Electronic Flight Instrumentation.....	11-5
Techniques for Electrical Usage.....	11-6
Standby Battery	11-6
Operating on the Main Battery	11-6
Analog Instrument Failure	11-6
Pneumatic System Failure.....	11-7
Pitot/Static System Failure.....	11-7
Communication/Navigation System Malfunction	11-8
GPS Nearest Airport Function.....	11-9
Nearest Airports Using the PFD.....	11-9
Additional Information for a Specific Airport.....	11-9
Nearest Airports Using the MFD	11-10
Navigating the MFD Page Groups	11-10

Nearest Airport Page Group	11-10
Nearest Airports Page Soft Keys	11-10
Situational Awareness.....	11-11
Traffic Avoidance.....	11-12
